

# DIAMOND NATURALS®

UNCOMPROMISING QUALITY AND PERFORMANCE, NATURALLY®

Made with ingredients of exceptional quality, Diamond Naturals provides complete, holistic nutrition for every pet. Each Diamond Naturals dry formula is enhanced with superfoods and guaranteed probiotics, for optimal nutrition and digestive support.

## PROPRIETARY PROBIOTIC TECHNOLOGY

Diamond Naturals dry dog formulas are formulated with **K9 Strain® Probiotics**, beneficial bacteria that support digestive and immune systems and help your puppy maintain an active lifestyle. **K9 Strain Probiotics** are developed specifically for dogs and processed under strict quality and safety standards to ensure purity. Every pound of Diamond Naturals is guaranteed to provide 80,000,000 colony forming units (CFU) of live, active probiotic cultures.

## SUPERFOODS

Superfoods are unique foods that are particularly high in nutritional value. These ingredients, including kale, chia seed, pumpkin and blueberries, are sources of key nutrients, such as antioxidants, vitamins, minerals, fatty acids and proteins. Superfoods help provide more complete nutrition for your pet.

Tiny bites made for tiny teeth deliver the complete nutrition your small breed puppy needs to grow up strong and healthy. Added DHA promotes proper brain and vision development, while omega-6 and omega-3 fatty acids help keep the skin healthy and coat shiny from the start.

## ANTIOXIDANTS

Powerful antioxidants and phytonutrients from superfoods such as blueberries, oranges, spinach and carrots help to support the immune system and a healthy lifestyle.

## DHA

Salmon oil provides DHA (docosahexaenoic acid), an omega-3 fatty acid that is important for brain and vision development in puppies. In nursing adult dogs, DHA is passed from the mother to the puppy through the mother's milk.

## OMEGA FATTY ACIDS

The superfoods chia seed and coconut, along with added flaxseed, provide the omega fatty acids that are essential for healthy skin, a shiny coat and overall well-being.

## DIGESTIVE SUPPORT

A blend of soluble and insoluble fibers from chia seed, pumpkin, dried kelp and coconut, combined with prebiotic fiber from dried chicory root, helps support a healthy digestive system.

## WITH CAGE-FREE CHICKEN

Chicken, along with chia seed and quinoa, provides protein for bones and muscles and lots of energy, helping your puppy stay active and fit.

## VEGETABLES AND FRUITS

Brightly colored vegetables and fruits like kale, blueberries, carrots and papaya provide an excellent spectrum of phytonutrients and an optimal array of vitamins.

## CHANGING TO DIAMOND NATURALS SMALL BREED PUPPY CHICKEN & RICE FORMULA

Changing your pet's diet should be a gradual process. Start by adding a small amount of your pet's new food to their current food. Gradually increase the new food amount and decrease the current food amount at each feeding. Continue this method for approximately one week. For sensitive dogs, extend the period to 10 to 14 days.
